About Your Company

Dear Hiring Team,

As a seasoned Senior Web Developer with over eight years of experience building high-impact, scalable applications across fintech, e-commerce, and SaaS sectors, I bring a strong blend of technical leadership, full-stack expertise, and a commitment to continuous innovation. I'm excited to bring this experience to a forward-thinking team like yours.

At Tech Nova Inc., I led the complete rebuild of a B2B SaaS platform using React, Node.js, and PostgreSQL, resulting in a 52% reduction in page load times and an 18% increase in user retention. I've designed and deployed microservices using Docker and AWS Lambda, integrated CI/CD pipelines, and modernized legacy systems—cutting deployment time by 60% and improving overall system reliability.

Beyond development, I thrive in collaborative environments where UI/UX, DevOps, and cross-functional teams come together to deliver clean, user-centric solutions. Whether building analytics dashboards for Cisco or e-commerce portals for Salesforce, I've consistently delivered scalable products that reduce costs, improve performance, and delight users.

I'm particularly drawn to opportunities that combine deep technical challenges with meaningful impact. My strengths in Angular, React, TypeScript, cloud infrastructure, and mentoring junior developers make me confident in my ability to contribute from day one and grow with your team.

Thank you for considering my application. I would welcome the chance to discuss how my skills and experience can contribute to your company's continued success.

Sincerely,

Eduardo Pourshahidi
