SUMMARY

Senior Web Developer with over **10 years of experience** building high-performance web applications in **fintech, e-commerce,** and **SaaS** environments. Proven ability to lead **agile teams,** improve performance by **30–60%**, and deliver **scalable, secure**, and **user-friendly** solutions.

Hands-on expertise in **Angular** (TypeScript, RxJS, NgRx) and **Java** with **Spring Boot,** with strong full-stack experience across the **MEAN stack**, **RESTful APIs**, and **microservices** architecture. Skilled in deploying and managing cloud infrastructure with **AWS,** and experienced in **Docker, ubernetes,** and automated **CI/CD pipelines**. Proficient in both **SQL (PostgreSQL, MySQL)** and **NoSQL** (MongoDB) databases, and committed to clean, maintainable code using testing tools like **JUnit, Jasmine,** and **Cypress.** Known for reducing bug rates by **30%** and mentoring junior developers to foster high-performing, collaborative teams.

EDUCATION

University of Central Florida

B.S. in Computer Science

Orlando, FL, United State

05/2011 - 08/2015

GPA | **4.0** / 4.0

EXPERIENCE

Tech Nova Inc
Senior Web Developer(Angular)

Remote
01/2021 - 06/2025

- **Led end-to-end development** of a modular internal **admin dashboard** using **Angular, TypeScript,** and **RxJS,** enabling cross-team collaboration and reducing new feature rollout time by **30%.**
- **Modernized legacy systems** by migrating UI components from **jQuery** to **Angular** and **Vue,** introducing a **component-driven** architecture that significantly improved code **reusability, accessibility,** and **design consistency** across the platform.
- **Architected and built microservices** using **Java** (**Spring Boot**), integrated with **RESTful APIs**, and deployed in containerized environments with **Docker** on **AWS ECS** and **Lambda,** ensuring **99.9% uptime** and improving deployment speed by **40%.**
- **Integrated CI/CD pipelines** using **GitHub Actions**, **Jenkins,** and **Docker Compose,** reducing manual deployment efforts by 60%, minimizing rollback frequency, and accelerating the release cycle.
- Worked closely with **cross-functional teams** including **DevOps, QA,** and **Product** to align engineering efforts with business goals.
- Wrote comprehensive **unit, integration,** and E2E tests using **JUnit, Jasmine, and Cypress,** driving **higher test coverage** and more stable releases.
- Championed best practices in **code reviews, Agile/Scrum ceremonies,** and **developer onboarding,** while mentoring junior developers on Angular and Spring Boot design patterns, improving overall team velocity and code quality.

Key Projects

Remote

Admin Analytics Dashboard–Cisco Company   02/2024 - 06/2025

Stack: Angular, TypeScript, RxJS, SCSS, Chart.js, REST APIs, JWT Authentication

- **Developed a feature-rich analytics dashboard** for internal business reporting using **Angular** and **RxJS.**
- The dashboard was designed to be **modular** and **scalable**, supporting future enhancements with ease.
- Integrated **role-based access control**, **lazy-loaded modules**, and dynamic **data visualizations** using **Chart.js** to provide a **seamless user experience.**
- **Page load time** was reduced by **40%**, and **usability** significantly improved based on **internal team feedback**.

E-Commerce Admin Portal –Salesforce Company   05/2021 - 04/2022

Stack - React, Node.js, PostgreSQL, Express.js, REST APIs, JWT Authentication

- **Built a robust, role-based admin dashboard** with features including **order tracking**, **analytics**, and **real-time inventory management**.
- The system **streamlined workflows** and provided administrators with **intuitive access** to **live operational data.**
- This led to a **40% improvement in administrative efficiency** by reducing **manual tasks** and accelerating **decision-making.**

CERTIFICATIONS

**AWS Certified Developer –
Associate (2023)
Certified ScrumMaster (CSM)**

SKILL

Web & AI Development

Front-End: Angular (RxJS · NgRx ·
Angular CLI) · React.js · Next.js ·
Vue.js · TypeScript
Back-End: Node.js · Express.js ·
Django · PHP · REST/GraphQL APIs
AI Development: Python (NumPy ·
Pandas · scikit-learn) · TensorFlow ·
PyTorch · OpenAI API · NLP
DevOps & Tools: Docker · Git ·
GitHub Actions · Jenkins ·
AWS(EC2, S3, RDS) · Vercel
Databases: PostgreSQL · MySQL ·
MongoDB · Redis · Your Skill ·
Testing: Jest · Cypress · Playwright ·
Mocha
Project Management: Agile/Scrum

Reviews

EXPERIENCE

CodeFusion LLC   Remote
Web Developer   06/2017 - 12/2020
- Developed and maintained over 15 full-stack applications using Angular and
  Java (Spring Boot), delivering scalable, secure, and high-performance
  solutions across multiple domains.
- Built reusable Angular UI component libraries, improving front-end
  development efficiency and reducing implementation time by 35% across
  projects. Ensured components followed accessibility and responsive design
  standards.
- Integrated third-party services such as Stripe, Twilio, and Firebase into Spring
  Boot back-end services, enabling secure and scalable data flows, real-time
  notifications, and seamless payment processing.
- Collaborated with teams to design clean APIs and optimize integration
  between front-end and back-end systems.

Key Projects   Remote
Customer Onboarding Portal – Intel Corporation.   11/2019 - 12/2020
Stack - Angular, Java (Spring Boot), Spring Security, REST APIs, SCSS, PostgreSQL
- Architected and developed a dynamic customer onboarding portal using Angular for
  the front end and Spring Boot (Java) on the back end, tailored for a fintech SaaS
  platform.
- Streamlined the onboarding flow with step-by-step navigation, real-time form validation,
  and seamless API integration, enhancing the user experience and reducing onboarding
  time.
- Implemented secure authentication and authorization using Spring Security and JWT,
  with efficient data access via Spring Data JPA and PostgreSQL.
- Ensured compliance with financial industry standards while optimizing performance,
  security, and scalability across both application layers.

BrightSpark Web Studio   Austin, TX : Hybrid
Junior Web Developer   08/2015 - 05/2017
- Created responsive websites and custom WordPress themes for 30+ clients.
- Optimized performance and SEO, improving client site rankings and reducing
  bounce rates by 40%.

Key Achievements
- Created over 30 responsive websites and custom WordPress themes tailored
  to client needs, spanning multiple industries.
- Applied SEO best practices and performance enhancements, resulting in a
  40% reduction in bounce rates and improved search engine visibility.

Key Projects   On-site
Real-Time Chat App – ServiceNow Company   01/2016 - 10/2016
Stack-Socket.IO, MongoDB, JWT.
- **Launched a secure real-time chat platform** serving over **1,000 daily active
  users**, built for **scalable communication** and **reliable performance**.
- Included features such as **live typing indicators**, **real-time notifications**, and
  offline message synchronization for a **seamless user experience**.
